About me

I am someone who enjoys being creative, especially when building web applications where I can express my ideas and imagination. In addition to programming, I like to spend time on the padel court, where I can release my energy. I also enjoy gaming and relaxing with friends. In my free time, I take pleasure in building LEGO architecture sets.

Skills

- Creative
- Team player
- Leadership
- Flexible

Programming Skills

- HTML & CSS
- PHP
- C#
- JavaScript
- React
- Vue
- Python
- SQL

Education

- Rotterdam University of Applied Science**
Rotterdam University 2022 - present
Currently pursuing my bachelor's degree at Rotterdam University of Applied Sciences, I have completed two minors: Cross-platform Development, focused on building applications for multiple platforms, and Security Lab, where we carried out hacking activities and learned how to prevent them.
- Media Technology Application and Media Developer**
Grafisch Lyceum Rotterdam 2019 - 2022
Having completed my MBO, I learned the basics of programming and laid a solid foundation for my further development.

Work Experience

- Intern Developer**
W3S Digital 2024 - 2025
Together with a team, we developed a Workflow Manager application for the company NVAO (accreditation organization) to speed up the accreditation process for education.
- Supermarket Employee (Part-time job)**
Albert Heijn 2018 - 2025
Over a period of seven years, I had the pleasure of working with a great team. Regularly, I took the lead in the mornings when the shift leaders were not yet present.
- Software Developer**
CE Services Group 2022 - 2022
After my internship, I was offered a contract to continue working at the company during the summer holidays. During this period, I primarily focused on developing the backend of a new WordPress website using PHP.
- Intern IT**
CE Services Group 2021 - 2022
During my first internship, I created a new, modern, and efficient website for the company.
